Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5-7, 9, 10, and 20-23 are rejected under 35 U.S.C. 102(b) as being anticipated by **Spencer (5,816,792)**. **Spencer** discloses a fuel-fired appliance which could include a boiler (SEE column 1, line 12 – column 2, line 4), a fuel burner (12) having an inlet portion, a pressure regulator (20) having an outlet portion coupled to the inlet portion of the fuel burner and has predetermined high and low stage settings (SEE column 3, lines 12-27), a fuel delivery apparatus (SEE Figure 1) coupled to the pressure regulator inlet portion and operative to deliver a selectively variable one of a first fuel which is digester gas primarily methane and carbon dioxide delivered at the high pressure stage setting, and a second fuel which is natural gas is supplied at a pressure lower than the predetermined pressure regulation setting, (SEE column 3) wherein the firing rate of the burner will not change regardless of which fuel is supplied. A three way valve (26) is connected to the pressure regulator inlet and is operative to receive the first and second fuels and also capable of allowing the flow of a selectively variable one of them to the pressure regulator; the methane and the natural gas have different

Wobbe indexes (SEE attached reference page) wherein the natural gas has a Wobbe index greater than methane.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Spencer (5,816,792)**. **Spencer** discloses the applicant's primary inventive concept as stated above, but does not particularly recite propane as one of the fuels fed to the burner. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used propane as one of the operating fuels, since it has been held to be within the general skill of a worker in the art to select a known fuel on the basis of its suitability for the intended use as a matter of obvious design choice.

Allowable Subject Matter

Claims 14-19 are allowed.

Claims 2, 8, and 11-13 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
